DISTRICT SUBURBS BEGIN SEWERAGE FACILITY FRAY

Suburban Sanitary Commission Is Ready to Make Report of Investigation to Legislature.

Special Correspondence of The Star.
HYATTSVILLE, December 22.—The Washington suburban sanitary commission, created in 1916 to investigate conditions of sanitation, water supply and sewage in the territory adjacent to the District of Columbia in Prince Georges and Montgomery counties, is preparing its report to the legislature.

William T. S. Curtis and Emory H. Bogley of Montgomery county and T. Howard Duckett of Prince Georges county, secretary to the board, together with Robert T. Morse, chief engineer of the state board of health, and his assistants, have been for two years investigating the necessity and possibilities of bringing all territory surrounding the District of Columbia and from six to ten miles from the District line under one general and co-ordinated system for the supply of water and for sewerage facilities.

They have reached the point where they are in a position to make definite recommendations to the legislature. Thursday night they invited the official representatives from all incorporated towns having sewerage plants and water works for the purpose of a conference with the idea of formulating a plan for co-operation.

Commission Explains Plans.
Representatives were present from Hyattsville and Mount Rainier in Prince Georges county, and Somerset and Glen Echo, Montgomery county. The situation was thoroughly canvassed. Mayor William A. Brooks, Councilman T. Hammond Welch and Corporation Counsel Vincent A. Shetty were present from Hyattsville. Mayor Perry Roswell and Councilman Lansing from Mount Rainier, Acting Mayor John E. Hahn of Glen Echo and Messrs. Stidham and Moore from Somerset.

The commission explained that their plans would depend largely upon the attitude of the incorporated towns now possessing water and sewerage plants. These plans, the commission stated, propose a complete water supply and sewerage system for all the territory within the District of Columbia and its extensions of the present systems, as the development of the various communities would seem to justify.

Divided Into Areas.

The entire territory is divided into drainage areas, each with its trunk and laterals and each covering some well defined geographical division of the territory. It is proposed to supply the areas as quickly as the work can be started and their necessities demand it. Each area, it is pointed out, contains at least one town, with its own water and sewerage system, and these towns must either be brought into the whole system as an entirety or operated as a separate unit by the local governing body.

After a thorough discussion of the merits of the suggested plans, it was agreed it would be advisable that the commission recommend the town systems be taken over as a whole, the towns to be paid a fair value for their plants and then operated as a part of the general system. In this way, it was agreed, much duplication of effort would be eliminated, many overhead charges saved, uniform water and sewerage systems for the whole territory assured and a great amount of money saved by the elimination of geographical lines.

LAUDS PRESIDENT'S POSITION.

Dr. Edward A. Eaton Addresses Men's Club on "Horizon."

Dr. Edward A. Eaton, president of Beloit College of Wisconsin, was the principal speaker at a banquet given by the Men's Club of First Congregational Church Friday evening at the church. The speaker was introduced by Rev. Dr. James L. Gordon, pastor of the church.

Dr. Eaton spoke on "Horizon," in referring to the war. "I cannot ignore the fact that we are in a world war. The problem is a gigantic one. It must be fought to the end. We must win. President Wilson looms up on the horizon as the man of the hour and we must encourage him in every step he takes."

Red Cross Branch to Cheer Departing Fighters.

RIGORS OF WAR, ASSERTS MOTHER OF BLACKSMITH, TOO MUCH FOR HER SON

Fearing the rigors of warfare would be too much for her delicate son, a woman living at Franklin, Cal., has written to United States Marine Corps headquarters here, asking that the young man be discharged.

"He is too weak and delicate to be in the service," she wrote. "He is a blacksmith's helper by trade and I would prefer him to stay at his last job."

The mother was informed that, for the time being, her son must remain a marine.

RAILROAD ADMITS BLAME FOR WRECK IN KENTUCKY

President of Louisville and Nashville Asserts Road Is Willing to Pay Claims.

By the Associated Press.
LOUISVILLE, Ky., December 22.—Milton H. Smith, president of the Louisville and Nashville Railroad Company, in a signed statement today, not only acknowledged legal responsibility of the company for compensation for deaths and injuries in Thursday night's wreck at Shepherdsburg, but suggested that claims be submitted to a committee and litigation avoided.

Forty-seven persons were killed in the wreck and approximately thirty-five others more or less seriously injured. It is expected claims aggregating thousands of dollars will be presented.

The statement, addressed to the public, calls the wreck the gravest catastrophe in the Louisville and Nashville Railroad Company's history, deeply deplores the deaths and injuries, promises the general public shall know just how the calamity came about, after a complete investigation has been made, and continues:

Never Contests Just Claim.
"In the meantime, however, in order that the Louisville and Nashville Railroad Company, which has never knowingly contested a just claim, may do what it can in the way of compensation, I desire hereby to definitely acknowledge legal liability in the case of the death or injury of all passengers and to suggest a method of ascertaining the amounts to which each is entitled.

A. O. Stanley, the Governor of Kentucky, appoint a committee of three men of integrity and high standing, one each from the counties of Bullitt, Nelson and Washington, to whom shall be submitted all claims, and to whom the company and the claimants cannot agree upon, their decision to be final.

Will Save Delay.

"This will save the claimants the delay and expense of litigation, and will insure a certain and just determination of their rights and will guarantee the receiving the full amount awarded instead of dividing it with others. This proposition is not dependent upon acceptance by all claimants, but is open for three months to all who may desire to avail themselves of it.

Funerals Suspend Business.

BARDSTOWN, Ky., December 22.—Business today was suspended in this little Kentucky town and Christmas preparations were stopped on request of Mayor John W. Strow, while funerals were held of some of the Bardstown citizens who were killed at Shepherdsburg in Thursday's Louisville and Nashville railroad wreck and arrangements made for others. The larger number will take place tomorrow. Hardly a family here has been left untouched by war in some manner.

Sixteen caskets in ten homes grimly tell the story. In the pretentious residence of Nat W. Muir, Bardstown banker and prominent Central Kentucky citizen, are three, containing himself, wife and son of seventeen. At the home of Radford C. Cherry, county attorney Nelson county, are the father, mother and son of eleven. In eight other homes one, sometimes two, members of the family lost their lives.

Mrs. Housewife—My Dear Madam:

THE FOOD ADMINISTRATION SAYS--

"Eat wisely and plenty, and waste nothing." This does not mean that we shall deprive ourselves of many of the delicacies we have been enjoying in the past, but it does mean that we shall do with a little less sugar, butter and white flour. If we each save a small quantity here and there, this, distributed among millions of housewives, means a great deal in the aggregate.

The food standard of the average American family is very high, and we have become accustomed to a certain amount of fancy cookery. To take this away will cause dissatisfaction. It is not so much a question of what to cook, but how to cook it economically and well.

Flavoring Extracts play an important part in the conservation of foods, for the reason they act as a blend, giving surprisingly delightful results in the use of inexpensive material or the making up of leftovers. Foods, when not properly flavored, become flat and unpalatable, and foods that are not pleasing to the taste are not economical, but wasteful.

A 25¢ or 50¢ bottle of Flavoring Extracts will last the average family from one to two months, and by employing it you may use to advantage leftovers, such as rice, stale bread, etc.

It is the desire of the C. F. Sauer Co. to co-operate with the United States Food Administration to the fullest extent, and to help the women of the country to do their patriotic duty without bringing dissatisfaction to their families. Will you help us? Send in your best ECONOMY recipes, using Flavoring Extracts. They will be useful to thousands of housewives, to whom we will later send them.

We will distribute \$100.00 IN CASH PRIZES for best recipes, as follows: For the best fifty recipes we will pay \$2.00 each, and for the next six best, one package of Sauer's Extracts to each. Send in a carton or label from package of Sauer's Extracts with your recipes.

Yours for more economical living,

C. F. SAUER COMPANY,

Dept. A Richmond, Va.
